

12V Sealed Lead-Acid Battery Charger

Price: \$25

This is a great 12 volt charger that will charge your batteries overnight and can be left on the battery to maintain the charge all winter. It has 3 charging steps (see below)-that ensures the battery always receives a complete charge and is never over-charged.

- Can be used with 110V/60 Hz or 220 V/50 Hz when you travel outside North America.
- Small size 75 x 51 x 28 mm (3 x 2 x 1 inches)
- Protected from reverse polarity and short circuit

3 Step Charging Process

Step 1

constant current 750 mA \pm 100 mA

Step 2

constant voltage 14.75 volts \pm 0.25 volts

Step 2

float charge 13.75 \pm 0.25 volts when the battery charge voltage is above 14 volts
