

The Canopy Glove

Constructed from silver stretchy fabric, the canopy glove reflects the sunlight and keeps the cockpit cool. This style of canopy cover is particularly useful for LS series gliders or gliders with 2 piece canopies, such as early DG100/200 and Jantars that can not close properly using the *SimplifyKool* cap style cover. The canopy gloves are custom-made for each glider type for a very tight fit.

Price: \$200

Cotton canopy covers are also available - please email me for a quote.
