

## The FlarmLED Display

A simple and concise display of flarm traffic and collision threats. LED's illuminate indicating the direction (azimuth) and difference in height (elevation) of the target with respect to your position. Includes a loud audible beep for traffic and threats.

The small size (42 x 25 x 5 mm) allows it to be in any open corner of your instrument panel.

Can be connected to any Flarm or PowerFlarm device.

**Price: 120 €**

## The FlarmLED + Display

The + display adds the horizontal distance to the target at the centre of the clock display

**Price: 170 €**
