

A Touchscreen Flight Recorder

The Nano 4 measures 69 x 105 mm (approx 2.75" x 4"). It is IGC approved to the highest level and incorporates both bluetooth and wifi for communication with Android or iOS devices.

Price: 690 €

The Engine Noise Level monitors both Jet and the Standard internal combustion engines.

The Nano 4 will run for up to 36 hrs (14 hours with the screen on) using its internal battery and can display airspace and task information. It also does final glide computations and incorporates a back-up variometer function.

Besides wireless connectivity, it also supports USB mass storage and RS232 protocols.
